HOW THE US-CHINA TRADE DISPUTE IS REDEFINING GLOBAL TRADE

Since Donald Trump took office in 2017, trade flows and market shares have changed substantially. We think that shift is set to continue under looming tariffs and a new protectionist environment

FUSION DELIVERS STABILITY, VALUE, AND COMPETITIVE EDGE FOR YOUR FUTURE-PROOF SUPPLY CHAIN

Fusion Corporation
Dec 18, 2024

Partnering with Fusion offers U.S. businesses a strategic edge in navigating today's complex supply chain landscape. By leveraging production capabilities across Southeast Asia, we provide high-quality products with competitive pricing, minimizing dependence on China and mitigating risks tied to concentrated trade. Our well-positioned manufacturing partnerships help businesses adapt to geopolitical and economic shifts, ensuring stability and value in every purchase.

Planning ahead for next year's orders is key to securing timely delivery and locking in the best prices. Delaying could lead to higher costs due to tariff-related price volatility. Take control of your supply chain with Fusion today.

CHEAP PLASTIC FROM CHINA AND THE US IS THREATENING SUSTAINABLE PLASTIC COMPANIES

Cheap plastic from China and the United States is threatening Dutch companies that produce, process, and reuse plastic. Organizations from the sector are calling on the Cabinet to ensure more reused plastic is used, otherwise, job opportunities and sustainability will be endangered.

Although plastic consumption is increasing, plastic production is decreasing, and many recycling companies are going bankrupt. The sustainability of the entire chain is at stake, they said.

The Netherlands is the fourth largest producer of plastic in the European Union and is one of the leaders in collecting and recycling plastic waste. Cheap imported plastic is putting this position under pressure.
